205 HAZARDOUS SUBSTANCE (Chemical) SPILL

Introduction: The HAZardous Waste Operations and Emergency Response standard, 29 CFR 1910.120 Paragraph (q) covers:

“Emergency response operations for releases of, or substantial threats of releases of, hazardous substances without regard to the location of the hazard.”

“Hazardous substances” includes about every known chemical. “Location” means any place on the IU Campus where chemicals are being used or stored, such as the Chemistry Building, Physical Plant, IU Art Museum, dark rooms, etc. Releases are either incidental or emergency response situations.

A. Incidental Release

An incidental release is a release of hazardous substance which does not pose a significant safety or health hazard (i.e., fire, explosion, or chemical exposure) to employees in the immediate vicinity or to the employee cleaning up the released hazardous substance. In addition, an incidental release does not have the potential to become an emergency within a short time frame. Incidental releases are limited in quantity, exposure potential, and toxicity and present minor safety or health hazards to employees in the immediate work area or those assigned to the clean up. Responses to incidental releases of hazardous substances where the substance can be absorbed, neutralized, or otherwise be safely controlled at the time of release by the employee in the immediate release area are not considered to be emergency response within the scope of this standard.

All employees that work with hazardous substances must be trained to protect themselves in handling incidental releases per the training requirements of the Hazard Communication standard (29 CFR 1910.1200) or the OSHA Lab Standard (29 CFR 1910.1450). Response to a release of this nature does not require full Hazardous Waste Operations & Emergency Response (HAZWOPER) training, this will be covered in the next section.

B. Emergency Response Situation

A release that requires an emergency response regardless of the circumstances is defined by the situation and requires full HAZWOPER training. An emergency response includes the following situations:

1. The response comes from outside the immediate area of the release. (This includes in-plant personnel who are outside the immediately affected area but respond to the release.)
2. The release required evacuation of employees in the area
3. The release poses, or has the potential to pose Immediately Dangerous to Life and Health (IDLH) conditions.
4. The release requires immediate attention because of imminent danger.
5. The release may cause high levels of exposure to toxic chemicals.
6. One is uncertain as to whether the employee in the work area can handle the severity of hazard considering the Personal Protective Equipment (PPE) and equipment provided.
7. The situation is unclear or data are lacking on important factors.

Those situations that may be incidental or may be an emergency response must be determined on a case-by-case basis. However, the prime component is knowledge and understanding of the chemical, its hazards, and proper handling procedures. Other factors that play a role in this determination are the quantity released, ventilation considerations, confined space considerations, and personal protective equipment available. Essentially, one must determine what the circumstances are, then determine the capabilities of the personnel available, and lastly determine whether the release occurs and it is considered more than incidental (non-incidental), you will want to contact the Department of Environmental Health and Safety's (DEHS) Emergency Response Team at 855-6311 or by dialing 911 or 9-911 after hours. There is a possibility of a non-incidental release in any area that contains hazardous substances. The principal investigator (or supervisor) for each area is responsible for determining if such a non-incidental HAZWOPER emergency response situation could occur under a worst-case scenario. All HAZWOPER emergency response would require evacuation of personnel. The Principal Investigator (or supervisor) must designate employees who have training and competency as a HAZWOPER *First Responder* to decide if other employees need to be evacuated under 29 CFR 1910.38 (a), Emergency Action Plans. The spill could then be addressed by DEHS's Emergency Response Team. As in the past, DEHS will provide an advisory role to incidental spill response if assistance is needed.

ACCIDENTS

300 INCIDENCE OF PERSONAL INJURY

All attempts should be made to see that the persons involved in accidents and receiving any kind of personal injury receive proper medical attention from qualified personnel. When in doubt, call IUPD. In all cases of injury or illness, the Director's Office or building manager/security supervisor should be notified immediately and an accident report form (See Appendix C) must be promptly completed.

A. STUDENTS

In the event of accident or illness of a student, IUPD should be called. They will make the decision whether the student shall be taken to the IU Health Center or to the Bloomington Hospital Emergency Room.

B. CONFERENCE GUESTS

In the event of accident or sudden illness where medical treatment is needed, contact IUPD. Participants should be transported to the nearest appropriate medical facility. If the participant is under the age of 18, a medical release form should be on file in the conference's campus office. The location and phone number for this office is listed in the Reservations & Arrangements form. Always inform IU Conferences (855-4661 or meet@Indiana.edu) of any injury or accident.

C. VISITORS AND NON – CONFERENCE GUESTS

In the event of illness or accident where medical treatment is needed, call IUPD.

305 REPORTING THE INJURY OF AN EMPLOYEE

The employee's immediate supervisor must notify the IMU Personnel Office of any injury as

soon as possible, regardless of how small the injury may seem, so there will be no questions if Workmen's Compensation Coverage needs to be used at a later time or if medical insurance is involved, etc. An injury report should be made by the employee's supervisor or IMU Administrative personnel.

310 REPORTING THE INJURY OF ANYONE OTHER THAN AN EMPLOYEE

Accidents resulting in injury to any guest must be reported as soon as possible to the Director's Office on a Visitor's Accident Report Form. The Director's Office will forward a copy of the injury report to IU Risk Management. Generally, University insurance will only cover the costs of an accident if its equipment, employees, etc. are at fault. However, if an individual is simply on Indiana University property and a problem occurs it is the individual's responsibility.

315 HOW TO REPORT INJURIES

Injury reports should include: the name, Social Security number, and address of the individual; time, place and kind of accident; extent of injuries; where the injured person was taken; first aid rendered; attending physician if known; and a complete description of the cause of the accident and contributory conditions. A standard accident report is available from the Director's Office or the building/security manager (See Appendix C).

DISTURBANCES

600 GENERAL DISTURBANCES

The Indiana Memorial Union staff will use common sense and diplomacy when dealing with persons who are causing disturbances, and should remember that any contact can be considered an assault. It may be helpful to remove the troublesome individual from the public area to a private office for conference. This may result in calling IUPD or the offender's parents if he/she is under 18 years of age. It is our hope that the Indiana Memorial Union staff can handle many of these disturbances without calling IUPD. However, when it is necessary to call IUPD-when an individual must be removed from the premises-proper procedure should be followed.

605 DISTURBANCES CAUSED BY ADULTS – MISDEMEANORS – INCLUDING COLLEGE STUDENTS

In case of misdemeanor law violation or destruction of property occurring in the presence of IMU personnel, but not in view of an IUPD officer, the IMU employee will prefer charges and arrest will be made by the IUPD officer. The IMU employee will prepare a case report as soon as possible. The IUPD officer will prepare a case report listing the nature of the offense, witnesses, name and address of the offender. A copy of this report will be delivered to the deputy prosecutor.

If the offender is under the influence, continues to be disorderly or otherwise continues to violate the law after the IUPD officer arrives at the scene, the IUPD officer will make an arrest and file charges.

If a person is drinking alcoholic beverages in an unauthorized area explain the Alcohol policy and ask them to keep all alcohol in private guest rooms, The University Club, or a private banquet room where alcohol is being served.

If a person enters the building with alcohol indicate such an action is not acceptable and ask that the beverage be removed. Should the person be intoxicated, creating a disturbance, under the age of 21, or a repeat offender, call IUPD to have him or her removed.

610 DISTURBANCES IN GUEST ROOMS

A. When a noise complaint is received, a page, building or security manager will go to the guest's room and politely ask the guest to reduce the noise in courtesy to other hotel patrons.

- B. Upon receiving the second complaint, once again the guest will be asked to reduce the noise level and be informed that IUPD will be called if there is another complaint.
- C. If there is a third complaint, IUPD will be called. The officer and IMU employee will go to the room where the officer will request that the loud patrons quiet down. The IUPD officer will give the guests a warning.
- D. At the fourth complaint, IUPD can be contacted and individuals arrested for disorderly conduct. IUPD officers will look to IMU employees for direction. Before requesting patrons be arrested, an employee must obtain authorization from the Director, Associate Director, Assistant Director for Guest and Meeting Room Services, Front Office Manager, or Building Manager.

1205 WHO MAY SOLICIT AND SELL

Use of facilities of the Indiana Memorial Union for soliciting and selling is restricted to registered student organizations and University departments. Such use is governed by University provisions for the use of facilities. Students or student groups who wish to solicit or sell must first obtain certification from the Student Activities Office and reserve space from the IMU Meeting Rooms and Reservations Office. The only exception to this is Union Board whose directors are able to directly contact Meeting Rooms and Reservations to reserve a space.

1210 SOLICITATION AND SELLING IN THE COMMONS LOBBY

Soliciting and selling by student organizations and university departments is permitted in the Commons Lobby Desk without charge. However, if the sponsoring organization contracts with an outside for-profit company (ie: credit card company) to solicit or sell, the regular rent charge will apply.

Commons desk space must be reserved in advance at the Meeting Room Reservations Office. Before reserving space, student groups must receive approval from the Student Activities Office. All soliciting and selling must be accomplished from behind the booth and an organization representative must be present. Individuals working the booths will not be allowed to interfere with the traffic flow in the hallway.

1215 CONDITIONS GOVERNING USE OF DESK SPACES IN THE COMMONS LOBBY

- A. Posters and other printed material may be affixed to the Formica desk tops and T-stands. They may also be tacked (not taped) to the bulletin boards behind the booths, but should not block literature which is already posted. They should not be affixed to walls, doors, or woodwork.
- B. The use of amplification devices must be at reasonable levels and the sound should be heard no further than 10 feet from the source. IMU management reserves the right to determine what reasonable amplification is. The use of audio and video equipment is permitted, however, the proper arrangements must be made prior to occupying booth space.
- C. All soliciting, selling, or recruiting must be made from behind the desk.
- D. All booths reserved by student organizations must be staffed with students currently enrolled at the Bloomington campus of Indiana University.

- G. Failure to claim a space within one (1) hour after the scheduled starting time may cause the space to be released to other qualified students or student groups on a first-come first-served basis.
- H. No student group may transfer their reserved space to another organization.

In no instance will organizations external to Indiana University be allowed to reserve space in the Commons Lobby.

Soliciting or selling by student organizations is permitted in other areas of the building if the activity is judged to be appropriate to the facility requested and the activity occurring. The collection of donations is considered the same as charging an admission and, therefore, a rental charge will be made for the use of facilities. The only exceptions to this is the Union Board, whose Directors may work directly with a reservationist in the Meeting Support Services office.

EMERGENCY ACTION PLAN

Indiana Memorial Union (Building No. 053)

I. PURPOSE

The purpose of an Emergency Action Plan is to protect the employees and guests from serious injury, property loss, or loss of life, in the event of an actual or potential major disaster. A major disaster may include, but not be limited to, any of the following: fire, tornado, earthquake, bomb threat, or hazardous chemical spill. In the event of a major disaster, this Emergency Action Plan describes the initial responsibilities and actions to be taken to protect all employees until the appropriate university or municipal responders take over.

II. RESPONSIBILITY

For the protection of employees, an Emergency Action Plan is a requirement of OSHA 1910.38. It is also necessary and prudent for the protection of our students and visitors. It is a requirement that the employer review with each employee upon their initial assignment, those parts of the plan that the employee must know to protect themselves in event of an emergency. In addition, the written plan shall be made available for employees to review and plan for their evacuation.

III. GENERAL PROCEDURES

It is impossible to provide specific information for all situations. Therefore, this plan is a guide for employees to familiarize themselves with basic emergency planning, response and evaluation.

A. **Pre-planning**

Preparation will increase the margin of safety in an emergency. To evacuate successfully:

1. Train employees in ways of assisting others
2. Inform employees how to communicate in an emergency
3. Assign specific tasks
4. Identify employees with specific needs
5. Provide a building specific plan

B. **Notification of Emergency Warning**

In the event of a disaster, the warning may come from any of the following sources: commercial radio or television, NOAA radio, building smoke detection or sprinkler system, private citizen, Indiana University Police Department (IUPD) or Building Manager. A person receiving notification of a possible disaster or a building emergency should immediately sound the alarm to notify employees and IUPD. (e.g. Yell "Fire!", pull building alarm, call other offices, etc.) Inform immediate supervisor who will continue notification up the Chain of Command. The building emergency alarm system is reserved for evacuation only.

REPORTING AN EMERGENCY

FIRE, POLICE, AMUBULANCE.....Campus Phones: **9-911**
Pay Phones: **911**
PHYSICAL PLANT/OPERATIONS (Utilities, Building Services, etc.).....5-8728

1. Activate alarm upon discovery of smoke, fire or explosion.
2. **DIAL 911 or 9-911**, from a telephone in a safe area, to report the incident to IUPD.

(There may be a 10 second delay before the operator answers.)

- Give your name, building room number and type of emergency.
- Stay on the line until you have given all necessary information.
- Evacuate the building. **CLOSE THE DOORS AS YOU LEAVE.**
- Use stairways. When out, move away from building to prearranged assembly area for a head count. Leave walks and drives open for fire and emergency responders.
- Activate fire extinguishers or fire hose, if necessary for a safe, orderly evacuation. At the discretion of the individual, use extinguisher if trained and assigned to do so.
- Notify fire fighters if you suspect someone may be trapped inside the building.

C. Emergency Control Committee

1. The membership of the committee is composed of:
The Indiana Memorial Union (IMU) Building Manager, and shall serve as the Chairman of the Emergency Control Committee. The Chairman shall appoint one staff member and one alternate from each floor, to serve as "Floor Monitor" and members of the committee.

Floor Monitors:

- Lobby: Beth Smith, Gary Chrzastowski, Roy Lovell
- Mezzanine: Thom Simmons, Michael Fazio, Tim Robben
- 1st.: Dave Calvin
- 2nd.: Corbin Smyth
- 3rd.: Jim Gibson
- SAC Tower: Building Manager on Duty
- Bookstore: Paul Hazel
- Food Service: Maureen Brown, Mark Wagner, Judy Drew
- Hotel Tower: Kathy Richardson, Hollie Lutz, Diane Banister, Beth Smith, Front Desk Supervisor on Duty

In the event of a disaster or immediate emergency, the committee members are to report to the Hotel Front Desk, designated as the Emergency Control Center, unless the prevailing situation dictates otherwise. Communication will be by (radio, public address system, or voice) with the ranking member in charge.

2. Responsibilities of the IMU Building Emergency Control Committee:

(a) Assess nature and extent of all emergencies.

(b) Assume initial control of all emergency actions until IUPD arrives, then:

- Assign persons to carry out specific actions.
- Order evacuation, if deemed necessary.
- Take any other action necessary to protect life.
- Review plan annually, revise as necessary, and make copy available to building employees and the Office of Risk Management.
- Instruct personnel of their duties.

In any emergency situation, the ranking member of the IMU Building Emergency Control Committee present shall have initial authority to coordinate procedures and amend, modify or supersede any provisions of this plan in order to ensure employee safety.

D. Emergency Control Center (Hotel Front Desk)

Emergency actions should be coordinated from the Emergency Control Center. The location will be designated by the Chairman of the Emergency Control Committee (Building Manager).

E. Disabilities

In an emergency, each person has different skills and abilities. Discuss with persons who have identifiable disabilities what assistance they may need.

1. Following are areas for persons who may need assistance in evacuation, e.g. hearing, mobility, vision or speech impaired, the elderly and children. The area for rescue assistance will have direct access to an exit, where those who are unable to use stairs or who are unable to navigate the emergency route may remain. Position the person so they do not obstruct the exit. (Do not use a stairwell, unless the emergency warrants.)

- Lobby; Woodlawn Entrance
- Commons Area
- Hotel Guest Rooms 100, 101, 120, 133, 220, 320, 356, 420
- Alumni Hall Area
- Bookstore Level 1

Department heads should discuss with individual employees any special requirements they may need and determine how they will communicate. At this time there are no individuals who indicate they may need assistance.

2. Communicate to IUPD where individuals can be found. (If possible, leave a two-

way radio with those in an area awaiting rescue assistance.)

F. First Aid Services

Emergency Medical Service (EMS) personnel or those individuals who are trained by the American Red Cross will provide first aid. Until rescue personnel arrive, first aid will be administered in the building or, in the event of a complete evacuation, at a designated safe assembly area outside.

G. Utility Controls

IMU maintenance personnel (5-7022) will know the location and operation of main controls for shutting off the gas, fuel oil, electricity and water leading into the building. For campus utility or building service emergencies call: 5-8728.

H. News Information

Information to the news media will only be released, as deemed necessary, through Public Affairs and Government Relations: 5-0850 or pager 337-5852, or the Director's office.

IV. EMERGENCY ALARMS

A. Sprinkler Alarm – Smoke Detection – Fire Alarm

In the event of a fire, sprinkler and/or HVAC smoke detection systems will activate the alarm automatically. The Ademco dialer will send a notification to IUPD/Control Center. Manual alarms, pull station or break glass models, are located on each floor.

B. Action

When seeing smoke or fire, after verbally warning employees and guests in the immediate area (e.g. the same room), **close the door** upon exiting and activate the nearest manual fire alarm. Immediately proceed to the outside evacuation sites and conduct a roll call. Upon hearing the alarm, employees shall, unless otherwise assigned, call **9-911** from a campus phone or **911** from a pay phone on another floor – if it is safe – or from outside the building. **There may be a 10-second delay before you hear the ring.** At least one member of the Emergency Control Committee should report to the evacuation sites outside the building. The other members should take action to ensure the safety of employees and notify proper agencies for any services that are needed.

C. Building-wide, Outside Evacuation

The signal/alarm for a building-wide evacuation will be the sound of the fire alarm. All employees and guests are required to evacuate the building, unless authorized to remain by the emergency agency in charge. Evacuate to HPER, Ballantine Hall or Dunn Meadow. Report to IUPD or the Fire Department any individuals who may be trapped or missing.

D. Segmented Area Evacuation

Building Manager, Risk Management, Environmental Health and Safety, Fire Department, Police Department, or Emergency Control Committee will order this type of evacuation. Employees shall report to the closest available enclosed area without windows. e.g.,

restroom, center stairwell, hallway – **with doors closed**. The first-line supervisor should conduct a roll call of employees and report to a member of the Indiana Memorial Union Building Emergency Control Committee.

E. Phone Listings

Emergency telephone numbers are located at building pay phones and office telephones. Call **911** from a pay phone or **9-911** from a campus phone if an emergency occurs. The IU police dispatcher will be responsible for contacting the appropriate department or agency. Then, contact immediate supervisor.

V. EVACUATION SITES

A map of evacuation routes will be displayed in hallways and departments. Each map will show the way to an exit, depending on where employees are located in the building. ***Color and shape coding will indicate: location, exit route, exit doors and areas for rescue assistance.*** It will be the responsibility of the first-line supervisor to inform employees of these evacuation routes.

VI. PROCEDURE FOR EMERGENCY SHUTDOWN OF OPERATIONS

An emergency shutdown of the IMU Building can be ordered by the Building Manager or the ranking member of the Indiana Memorial Union Building Emergency Control Committee. No employee should risk any type of injury. However, if time permits, personnel should perform the following duties:

- A. **An emergency shutdown of computers** should be accomplished in the event of a severe electrical storm. If time permits, exit the program and shut off the computer power supply.

VII. TORNADO

In the event of a tornado or severe weather warning, the following procedure should be put into effect by the supervisor or Emergency Control Committee:

- A. Listen for latest advisories on radio.
- B. Post spotters at window to observe and report eminent weather changes.
- C. If necessary, initiate emergency shutdown procedures.
- D. Move personnel into designated safe assembly areas without windows (for example, a restroom, stairwell, hallway or office) and close the door.
- E. After tornado passes, restore calm and check for injuries.
- F. Report injuries and damage to IUPD via 9-911 or 911, then Risk Management.

VIII. EARTHQUAKE

An earthquake usually occurs without any type of warning. Due to the suddenness, all personnel should attempt to get into a doorway passage, under a table or desk, any place that the employee feels is safe. After an earthquake has stopped, initiate the following procedure:

- A. All employees should help restore calm.
- B. Those trained in first aid should check for injuries and provide assistance.
- C. The Maintenance Department should check for fires and shut off utilities, to control gas and water leaks.
- D. If major structural damage has occurred, the Emergency Control Committee should order a complete evacuation. The building should be inspected by Physical Plant for damage before reentry.
- E. Physical Plant should then notify proper agencies, companies or departments as needed. For major structural damage, the university will make the decision (i.e. Physical Plant or Engineer's office.) Minor damage will be assessed by Winston Shindell, Thom Simmons or Gary Chrzastowski.

IX. **BOMB THREAT**

Normally a bomb threat will be received over the telephone. The following procedure should be followed:

- A. The person receiving the bomb threat should remain calm and obtain as much information as possible by completing the attached form (appendix 1). **Immediately call 9-911 or 911.** Give all available information. Notify IUPD, then immediate supervisor.
- B. If a suspicious package or device is found **immediately** notify the police. ***Do not touch or handle any suspicious item! Do NOT use the fire alarm.***
- C. The Building Manager, her/his designee or the ranking member of the IMU Building Emergency Control Committee, after consultation with the University Police, will be responsible for ordering an evacuation of the building and will cordon off the area until IUPD arrives. If evacuation takes place, do not re-enter until the building has been searched and declared safe by the authority having jurisdiction.
- D. If a bomb threat is received by written communication, immediately notify IUPD, **9-911 or 911.** Do not handle the communication any more than is necessary. Surrender the document to IUPD upon their arrival.

X. FIRE PREVENTION AND WORKPLACE HAZARDS

A. It is the responsibility of all employees to prevent any type of fire in the building. Listed below are general items to accomplish this objective:

1. Follow general guidelines supplied by the office of Risk Management or Environmental Health and Safety. (Refer to Control of Workplace Hazards page 17 and the Faculty Emergency Procedures Handbook.)
2. Smoking is not allowed in Indiana University buildings. Extinguish all cigarettes in their

proper place.

3. Do not put any type of hot object, such as cigarette butts, in trash cans.

A. Listing of Typical Workplace Hazards

1. Flammable Solvents (Such as maintenance amounts of gasoline, paint thinner or degreaser.)
2. Impaired Fire Controls
 - a. Fire and smoke doors blocked open.
 - b. Storage and trash in stairways and hallways.
 - c. Storage closer than 18 inches to sprinkler heads.

XI. HAZARDOUS SUBSTANCE (Chemical) SPILL

Introduction: The HAZardous Waste Operations and Emergency Response standard, 29 CFR

1910.120 Paragraph (q) covers:

“Emergency response operations for releases of, or substantial threats of releases of, hazardous substances without regard to the location of the hazard.”

“**Hazardous substances**” includes about every known chemical. “**Location**” means any place on the IU campus where chemicals are being used or stored, such as the Chemistry Building, Physical Plant, IU Art Museum, dark rooms, etc.

Releases are either incidental or emergency response situations.

A. Incidental Release

An incidental release is a release of a hazardous substance which does not pose a significant safety or health hazard (i.e., fire, explosion, or chemical exposure) to employees in the immediate vicinity or to the employee cleaning up the released hazardous substance. In addition, an incidental release does not have the potential to become an emergency within a short time frame. Incidental releases are limited in quantity, exposure potential, and toxicity and present minor safety or health hazards to employees in the immediate work area or those assigned to the clean up. Responses to incidental releases of hazardous substances where the substance can be absorbed, neutralized, or otherwise be safely controlled at the time of release by the employee in the immediate release area are not considered to be emergency response within the scope of this standard.

All employees that work with hazardous substances must be trained to protect themselves in handling incidental releases per the training requirements of the Hazard Communication standard (29 CFR 1910.1200) or the OSHA Lab Standard (29 CFR 1910.1450). Response to a release of this nature does not require full Hazardous Waste Operations & Emergency Response (HAZWOPER) training, this will be covered in the next section.

B. Emergency Response Situation

A release that requires an emergency response regardless of the circumstances is defined by the situation and requires full HAZWOPER training. An emergency response includes the following situations:

1. The response comes from outside the immediate area of the release. (This includes in-plant personnel who are outside the immediately affected area but respond to the release.)
2. The release required evacuation of employees in the area
3. The release poses, or has the potential to pose Immediately Dangerous to Life and Health (IDLH) conditions.
4. The release requires immediate attention because of imminent danger.
5. The release may cause high levels of exposure to toxic chemicals.
6. One is uncertain as to whether the employee in the work area can handle the severity of hazard considering the Personal Protective Equipment (PPE) and equipment provided.
7. The situation is unclear or data are lacking on important factors.

Those situations that may be incidental or may be an emergency response must be determined on a case-by-case basis. However, the prime component is knowledge and understanding of the chemical, its hazards, and proper handling procedures. Other factors that play a role in this determination are the quantity released, ventilation considerations, confined space considerations, and personal protective equipment available. Essentially, one must determine what the circumstances are, then determine the capabilities of the personnel available, and lastly determine whether the release is incidental or warrants an emergency response. **Therefore, if a release occurs and it is considered more than incidental (non-incident), you will want to contact the Department of Environmental Health and Safety's (DEHS) Emergency Response Team at 855-6311 or by dialing 911 or 9-911 after hours.**

There is a possibility of a non-incident release in any area that contains hazardous substances. The principal investigator (or supervisor) for each area is responsible for determining if such a non-incident HAZWOPER emergency response situation could occur under a worst-case scenario. All HAZWOPER emergency response would require evacuation of personnel. The Principal Investigator (or supervisor) must designate employees who have training and competency as a HAZWOPER *First Responder* to decide if other employees need to be evacuated under 29 CFR 1910.38 (a), Emergency Action Plans. The spill could then be addressed by DEHS's Emergency Response Team. As in the past, DEHS will provide an advisory role to incidental spill response if assistance is needed.

C. Response Flow Chart

XII. CONTROL OF WORKPLACE HAZARDS

- A. Flammable and combustible materials will be stored in a designated area or flammable storage area. Refer to laboratory safety standards.
- B. Good housekeeping will be the responsibility of **ALL** employees.
 - 1. Waste materials are to be discarded in their proper places.
 - 2. Heat producing equipment shall be maintained in good working order and a minimum of 36 inches from combustible items.
 - 3. Personnel are responsible to keep their work areas neat and orderly.
 - 4. All aisles and exits will be kept clear.
 - 5. Access areas to fire extinguishers will be kept clear.

6. All employees will know the evacuation routes and exits, and will proceed to them when instructed.
 7. All employees will be instructed on the building Emergency Action Plan.
 8. Emergency telephone number, **911**, will be posted on all pay telephones.
 9. Each supervisor will be responsible to properly train their employees who are required to handle, store and maintain hazardous materials.
 10. All fire/smoke doors are to remain closed and unobstructed from their intended function of retarding the spread of fire and smoke.
- C. Following any emergency, a post-emergency evaluation will be conducted to evaluate the cause, employee and outside department actions, and to determine what corrective or preventative actions are necessary.
